

SIO Shipyard Representative Bi-Weekly Progress Report		
Project: AGOR 28	Contract No.: N00014-12-C-0305	Shipyard: Dakota Creek Industries
Prepared by: Paul D. Bueren Scripps Institution of Oceanography (SIO) 297 Rosecrans St. San Diego, CA 98106	Date: September 23, 2014	Program Officer: Robert (Tim) Schnoor Office of Naval Research 875 Randolph St ONR 321 Arlington, VA 22203-1995
Distribution Statement A: Approved for public release; distribution unlimited.		Report No. A002.063

1. Meetings:

- i. Participated in weekly conference calls.

2. The following Shipyard Question Submittals were reviewed and commented on:

No questions this reporting period.

3. Logistics:

- i. Continuing to review Vendor Recommended Spares (VRS).
- ii. Continuing to review Technical Manuals and Supplemental Information.
- iii. Continuing to work on initial outfitting lists for Sally Ride.
- iv. Working on NS5 Hierarchy

4. Sally Ride Progress & Operator Concerns:

- Side & CTD Handling Systems – Concerns have been raised over discrepancies in what the actual working reach of both system are. The current load chart indicates 19-feet whereas a minimum of 22-feet is required by the specifications and 24-feet by the CSS. (7, 10 and 12-ft over the side). The government has informed DCI of this and is awaiting a response.
- Steering Room Ventilation – The yard had to modify the ducting in way of the starboard take-up reel's level wind sheave. The duct now drops down below the sheaves area of travel. The encoder mounted on the top of the sheave further reduced the available clearance.

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

Sheave Encoder Clearance

- HVAC – Duct installation continues.
- Pilot House insulation work continues. Window wiper system installation underway in overhead.
- Carpenters are back on Armstrong doing finish work, so no additional work on Ride at this time.
- Electrical – Single electrician working on galley and foc'sle deck wiring in way of joiner work.

Galley range hood with panels & wiring

- Joiner Work – Paneling going up on Foc'sle deck. The yard is not securing the panel until the electricians have a chance to run the wiring as the panels have to be moved to allow access behind. It is a bit cumbersome, but at least they are making progress.

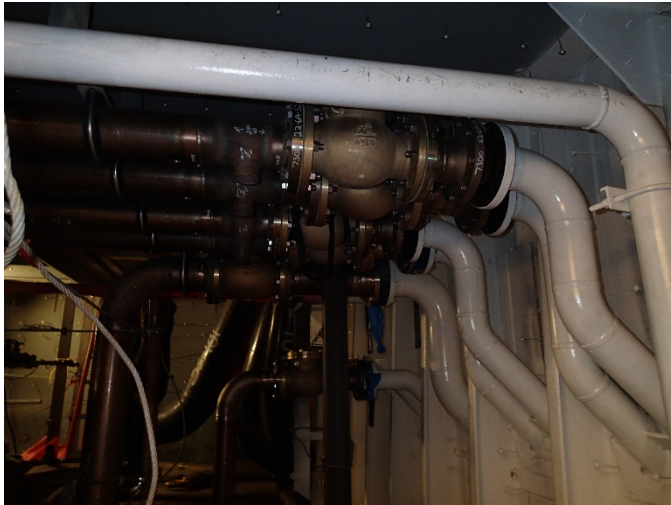

Foc'sle Deck Joiner work

- Painting throughout the vessel continues.

Ride Transceiver Room

- Seawater Piping – Engine overboard piping nearing completion. Missing butterfly valves and de-icing lines.

5. Call-outs:

- No call-outs for Sally Ride since 8/28 as most of the structure is 100% complete. No piping systems are complete and ready for testing as of yet.
- Allied FAT for the main crane is scheduled for the September 28 & 29.
- Yard asked for and received guidance from the operators on the location of the local hydraulic controls for both handling systems on Armstrong.
- Yard asked for and received guidance from the operators on the location of three panoramic rudder angle indicators for Armstrong's Pilot House.

6. The following DRL's were reviewed and commented on:
